CHURCH OF THE FELLOWSHIP  
804 2<sup>ND</sup> AVE.  
ROCKFORD, IL 61104

To Whom It May Concern;

Our congregation and community would like to sincerely thank Eco Shield Public Adjusters for the time, effort, and knowledge you put into the project of renovating our church facility. We are able to begin the New Year and a whole new stage in our church's success without that concern, and with a safe and beautiful building to house our community. Your team was effective and on point throughout the process with gave us complete peace of mind.

Eco Shield Public Adjusters followed through from beginning to end during the entire claims and final construction and renovation process with our church facility, being very easy to communicate with and putting our minds at ease if anything came up that we might have a question about. They were able to upgrade our roof to a 30 year architectural shingle with no extra expense to us and EPDM roofing system, and also added top quality roof insulation. Due to their extensive knowledge of the claims process they were also able to achieve an increase in the scope by 30% to cover all of our facility's renovation costs.

Thank you again for all that you achieved and for making a difference in so many lives through your persistence with the insurance provider and your determination to see the project through. We would definitely highly recommend your company and services.

Sincerely,

Charles Threadgill Sr.  
Pastor
