To Whom It May Concern;

We were very pleased with Eco Shield Public Adjusters management of our claims process with our insurance carrier. We know that we would not have been able to come to the same satisfactory conclusion on our own; they were efficient and professional and represented us with our best interests in mind following through with the process till the very end.

We placed a claim & after the Eco Shield Public Adjusters representatives met with the insurance engineers, they came to the conclusion that the engineer's assessment had been biased so another engineer was hired to give us an unbiased assessment of the property. During that assessment it was discovered that the damage was sufficient to cause functional damage to the property. After that the insurance refused to settle for the amount we were requesting, so Eco Shield Public Adjusters took the process to an appraisal, which is a provision in the policy, subsequent to that they achieved the full replacement of all damaged systems.

A project of that complexity could not have been in better hands, we were quite confident during the process that we had made the right choice in working with Eco Shield Public Adjusters and we could have been more correct in making that decision. We recommend them in any circumstance

Regards,

Rev. Steve Spiller Sr.
